

Noise Proofing Sealant to be used on both layers at all joins and penetrations.

Surface mounted lights (ceiling or wall) are a preferred option to downlights.

GPO or other wall mounted connections to be mounted on a mounting block (See Option A.). Alternatively, add 2 layers of plasterboard with Noiseproofing Compound and stick behind the Surface Mounted GPO overlapping with a minimum of 200mm. (See Option B.). Option A. is preferred.

Patch Bays should be surface mounted
